New user account request

iot4u homepage (<http://iot4u.my>)

To request for a new account, user can visit (<http://iot4u.my>) and click on Request a Free Account button. It will redirect you to (http://iot4u.my/request_acc.php) which will contain a form for user to request for a account. For account request, user only need to enter their email and university name and press request.

iot4u request account (http://iot4u.my/request_acc.php)

Upon successful account request, user will be greeted with a confirmation message. User will need to wait for admin to approve the request, where an email containing a temporary password will be sent to the user's inbox after approving.
